

Technical Parameter for 9kV Explosion-preventing and auto-separating Metal-oxide arrester

| No. | Items | Technical parameters |
|-----|--|----------------------|
| 1 | Type | Outdoor |
| 2 | Part No. | YH5WS-17/50SPE |
| 3 | Rated Voltage | 9kV |
| 4 | Maximum Continuous Operation voltage(Effective value) | 7.65kV |
| 5 | Nominal Discharge current | 10kA |
| 6 | 1/5(s Steep current residual voltage (peak) ≤10kA | 29kV |
| 7 | 8/20(s Lightning impulse current residual voltage (peak) ≤10kA | 26.5kV |

| No. | Items | Technical parameters |
|-----|--|----------------------|
| 8 | 30/60(s Operating impulse residual voltage (peak) ≤500A | 22.5kV |
| 9 | Reference voltage At D.C. U _{1mA} ≤ | 15kV |
| 10 | Leaking current At D.C. 0.75 | 50μA |
| 11 | 2ms Rectangular current withstand 20 times | 250A |
| 12 | 4/10(s Short-time withstand current (peak) | 100kA |
| 13 | Transmission line Discharge Level IEC60099-4 | 1 |
| 14 | Total Energy absorption capacity(Ratio: kJ/kV) | 3 |
| 15 | Insulation Resistance capacity 1.2/50(s Lightning impulse withstand(peak) 1min Power Frequency wet withstand (Effective value) | > 95kV 28 kV |
| 16 | Maximum continuous relatively operation voltage radio interference voltage (RIV) ≤ Partial discharge ≤ | 2500μA 50PC |
| 17 | Wiring Panel permissible load Level Transverse Safety coefficient | 147N 147N ≥2.5 |
| 18 | System connecting method | Phase to Earth |
